

Protecting Revenue with Better Payments & Policies

**Want to protect your revenue?
You've got to keep operations moving.**

Common issues like no-shows, delayed payments, or manual refunds don't just impact accounting — they slow down dock operations, delay turnarounds, and reduce vessel uptime during peak demand.

Storable Marine smooths operations by streamlining billing, payments, reservations, and check-in workflows.

The Challenge

Many marinas still manage:

- Refunds case-by-case
- Reservation changes & manual invoice edits
- Payments across disconnected systems
- Billing updates through spreadsheets or email
- Limited visibility into outstanding balances
- Manual coordination between office and dock staff

The result?

- Boats sit out of rotation longer than necessary
- Vessel turnarounds slow down
- Service delays increase during busy weekends
- Check-ins take longer
- Staff spend more time resolving billing issues
- Revenue leakage from billing errors and delayed collections

The Reality of Dock Operations

During peak weekends, even small billing delays create operational bottlenecks.

When invoices don't update automatically or payments take too long to process:

- Check-ins take longer
- Dock staff wait on approvals
- Boat turnarounds slow down
- Boats stay unavailable getting serviced for longer
- Teams are tied up fixing administrative mishaps

On the dock, every ready-to-rent vessel matters. That's why operational efficiency directly boosts and protects revenue.

The Opportunity

Storable Marine automates and smooths operations on the back-end so that:

- Vessels stay ready-to-rent
- Service backlog is reduced
- Vessel uptime increases
- Dock operations move faster during peak weekends
- Teams spend less time resolving billing issues

We connect reservations, billing, payments, and operational workflows, so that you can reduce manual processes that slow your team down.

Big-Time Benefits

▶ Faster Turnarounds

Reduce billing bottlenecks that delay departures and keep boats out of rotation.

▶ Less Service Backlog

Reduce the back-and-forth with service techs that slow down fleet readiness.

▶ Smoother Check-Ins

Clear invoices and real-time updates help customers get out on the water faster.

▶ Faster Payments & Cash Flow

Send invoices instantly through email or text to accelerate collections.

▶ Improved Fleet Availability

Keep more boats ready-to-rent during peak weekends.

▶ Less Operational Friction (Especially on Peak Weekends)

Minimize manual tasks so staff can stay focused on dock operations and customer experience.

Revenue Protection Starts with Smooth Sailing Operations

Most revenue loss doesn't happen because refund policies or payments are missing.

It happens because operational bottlenecks slow down billing, check-ins, and vessel turnarounds.

Storable Marine helps reduce manual work and operational bottlenecks so boats stay running and revenue keeps moving during the moments that matter most.

5 Noteworthy Features

01. **REAL-TIME RESERVATION & BILLING UPDATES:** Automatically update invoices when reservations or services change.
02. **INTEGRATED POS + ONLINE PAYMENTS:** Manage reservations, fueling, service invoices, and retail purchases in one place.
03. **CONFIGURABLE CANCELLATION & DEPOSIT POLICIES:** Standardize refunds, deposits, and cancellation rules without manual calculations.
04. **FLEET READINESS VISIBILITY:** Quickly identify which boats are ready, which aren't, and why.
05. **MOBILE DOCK OPERATIONS:** Give teams access to payments, invoices, reservations, and reporting from anywhere on property.
