

One Connected System

Spreadsheets, paper work orders, and disconnected systems can't keep up with your service yard.

When service, billing, inventory, and technician updates all live in separate places, even small gaps create major operational slowdowns.

The Challenge

Your service team is manually managing:	Common operational issues:
Work orders and technician assignments	Technicians chasing updates instead of complete jobs
Parts and inventory tracking	Duplicate inventory orders and delays waiting on parts
Estimates, approvals, and billing	Delayed invoicing and slower revenue collection
Vessel maintenance history	Maintenance records buried in spreadsheets or tribal knowledge
Communication across teams	Front desk staff, technicians, and managers operating without real-time visibility

The Storable Marine Solution

All service operations, one connected platform.

► Work Orders & Technician Workflows

Create, assign, and track jobs in real time while keeping technicians and office staff aligned through mobile updates.

► Estimates, Approvals & Billing

Move from estimate → invoice faster with connected workflows that reduce manual entry and help teams collect revenue more efficiently.

► Parts, Inventory & Vessel History

Track inventory alongside active jobs while maintaining a centralized service history for every boat.

► Real-Time Operational Visibility

- Quickly understand
- What jobs are waiting on parts
- Which technicians are assigned where
- What work is ready to invoice

Big Time Benefits

When your systems are finally working together, the impact shows up fast:

- **Faster** Service Turnaround
- **Maximum** Fleet Utilization
- **Less Breakdowns** on the Water
- **Proactive** Boat Maintenance
- **No More** Unnecessary Spend on Parts
- **Faster** Revenue Collection

Built for Service Operators Like You

- **1,000+** marine customers
- **172,000+** slips managed
- **\$633M+** transactions processed
- **Integrations** with tools like QuickBooks

When boats are unexpectedly unavailable, billing gets delayed, or communication breaks down, both revenue and customer experience suffer.
